

# ADVANCED CLINICAL TAPING CERTIFICATION

**Location:**

**SUDAN**

**Date:**

**29-30 JULY 2022**

**Tutor:**

**Dr. Hayat Mostafa**

MSc, CMT, CDNP, CMP, KCMT

- Masters Cardiopulmonary Physiotherapy, Cairo University Certified OMTA Manual Therapist
- Certified Dry Needling Practitioner
- Certified Kinetic Control Movement Therapist
- Maitland Trained Therapist, IMTA, Switzerland

## **Topics to be covered:**

This program is designed to musculoskeletal and sports professionals. Clinical Taping is considered as an essential tool used by physiotherapists and health professionals as an adjunctive treatment for variety of clinical scenarios.

Although there's an ongoing clinical argument regarding the research evidence behind, however, there is a growing evidence suggesting that the effectiveness of taping application could be maximized if

- 1- Applied by professionals to ensure patients safety.
- 2- Application is based on sound clinical reasoning skills and knowledge ( e.g Surface anatomy Patho-kinesiology and patho-physiology)
- 3- Applied as part of the treatment package not as a stand-alone treatment.
- 4- Applied with consideration of patient preference.

In this highly practical program, all the above mentioned points will be discussed with specific consideration for practical application under tutor's supervision.
